

**INGEBER**  
INGENIERIA y SERVICIOS

## Who are INGEBER?

We are a Civil Engineering Consultancy Office integrated by people with long trajectory in the different branches of Architectural, Engineering and Construction, which allows us to offer a wide range of alternatives and solutions to the problems that Companies in the sector must face. Whatever the size of the Projects your Company leads, our services will always adapt to the requirements of Scope, Quality and required Deadlines, with the responsibility and enthusiasm with which we face every commitment.

INGEBER

### Structural Engineering

- Design of Reinforced and Prestressed Concrete Structures for Comercial and Residential Use.
- Design and Detailing of Steel Structures for Comercial and Residential Use.
- Design, Analysis and Detailing of Road and Railway Bridges up to 30m Spans.
- Pile and Slabs Foundations Engineering.

### Agriculture and Oil & Gas Industry Engineering

- Electromechanical Designs and Engineering for Solids Grain Processing.
- Design of Static and Dynamic Equipment for Oil & Gas Industry.
- Design and Calculation of Pressure Vessels and API Tanks.
- Piping Stress Analysis Engineering.
- Turnkey Plant Projects.

### Sustainable Engineering

All of our Design processes are based on the current human approach in everything related to the definition of new living spaces and urbanization, the transportation of people in their environment, the generation of alternative energies and the reduction in the generation of wastes, always validating structural safety and efficiently use of materials. It is Civil Engineering friendly to the Environment.

Quality Management System (ISO 9001) in all our processes.
